

Aeris Concierge Cloud

Hotel and Conference Centre Digital Signage

- * Visually direct patrons towards the right location
- * Create unlimited events and promotions with cloud-based software
- * Add and edit events online from any web enabled device

Digital Directional Signage for Your Venue

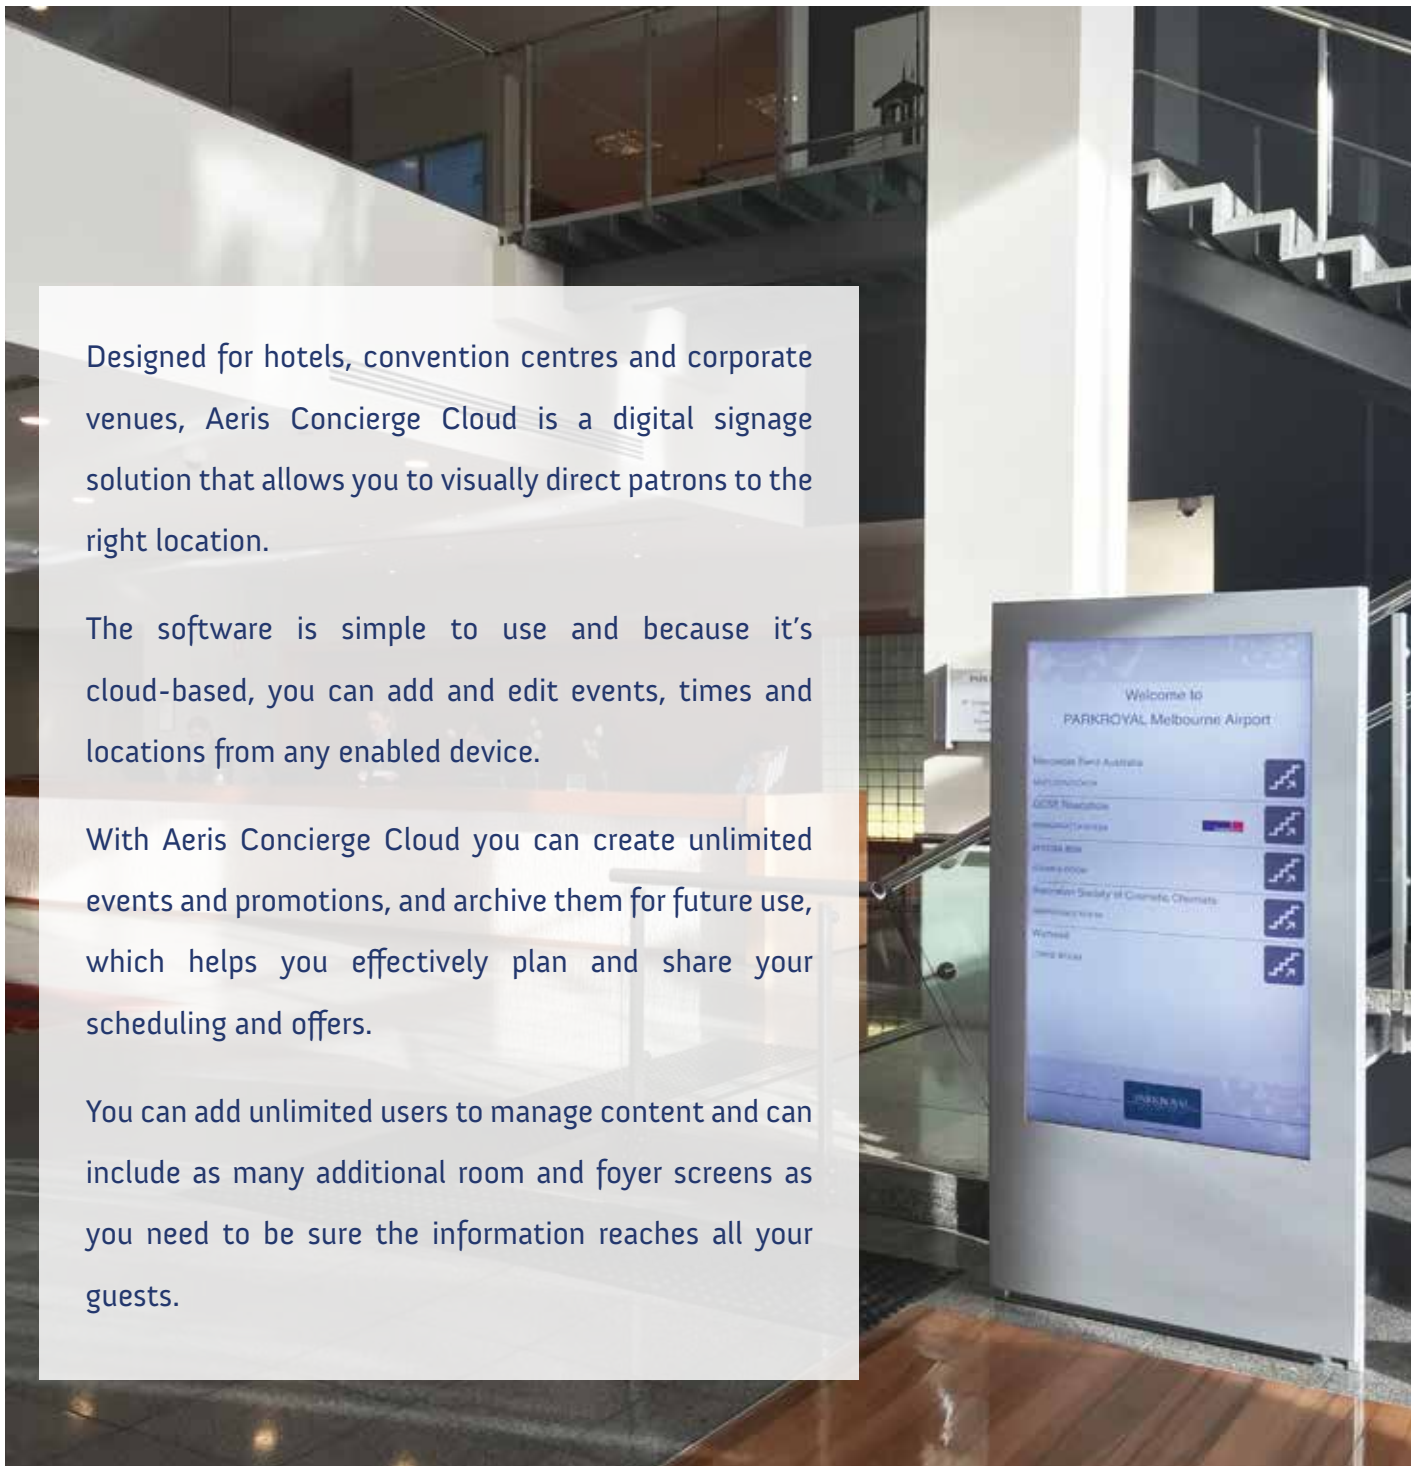

Need an effective way to guide your guests to their on-site destination? Aeris Concierge Cloud allows you to share event, conference and room details to ensure your patrons get where they need to go.

Designed for hotels, convention centres and corporate venues, Aeris Concierge Cloud is a digital signage solution that allows you to visually direct patrons to the right location.

The software is simple to use and because it's cloud-based, you can add and edit events, times and locations from any enabled device.

With Aeris Concierge Cloud you can create unlimited events and promotions, and archive them for future use, which helps you effectively plan and share your scheduling and offers.

You can add unlimited users to manage content and can include as many additional room and foyer screens as you need to be sure the information reaches all your guests.

- **Fast and Easy to Use**

The Aeris Concierge Cloud interface is simple to use, even for beginners. Your staff can quickly add or edit content as needed.

- **Upgrade Your Signage, Keep Your Hardware**

If you already have a digital signage installation running, you can easily upgrade to the cloud. Aeris Concierge Cloud will run on any Windows based PC.

- **Primed for Promotion**

When your screens aren't being used for events and meetings, Aeris Concierge Cloud can run your marketing content to maximise your brand power. Promote weekend packages, new bars, restaurant specials, local shops, day spas and much more using the dynamic digital directory board.

- **Free Support Service**

Aeris Concierge Cloud is not just software, it's also a service. We provide free support and software updates.

- **Flexible Cloud-Based Software**

Our cloud-based software allows you to create and edit events online from any computer or device with an internet connection. Plus, you can add unlimited users with a secure username and password to give access to multiple members of your team.

- **Clearly Display Diverse Content**

Whatever information you need to display - room names, company names, company logos, directional arrows, floor levels and more – Aeris Concierge Cloud can handle the content load. Meeting times can be shown on the screens to offer a detailed schedule to your clients.

- **Integration**

Simply integrate with Amadeus Hospitality or Oracle Hospitality.
